

Weissler Weekly

For the week of September 7th, **2020!**

Announcements

First Week

We had an excellent first week of school! The children are working together nicely and I am very proud of their efforts so far! Please help your children be ready for school each day by making sure they get enough sleep each night, limiting television, and providing a healthy breakfast. Studies have shown that children ages 5 through 12 need 10-11 hours of sleep each night.

Google Classroom

Beginning next week I will have lessons and assignments up in each Google Classroom. Students in class will also have the option to turn in their assignments using our google classroom.

CamScanner App

Please download this app for the phone or tablet. All students (in class and online) can use this to turn in any work via google classroom.

Homework

- On a normal day, students may have math homework if we did not have time to finish in class.
- We will have daily spelling assignments that will be due on Fridays. (Look for the Spelling Menu that should also go home with this newsletter.)
- Students will still be asked to read for 15 minutes each day. We will be completing a short readworks comprehension passage and google form online that will be due each Friday instead of a traditional reading log.

Snack and water

Please continue to remember to send a healthy snack and fresh water bottle with your children every day. (Please try to bring spoons or forks if you need them)

Essential Questions

What we are covering this coming week...

Math/ ELA/ SS/ Science

Review according to results of Baseline Testing

Dates

9/11- Spelling HW due (for practice)

9/11- Reading HW due (for practice)

Spelling Words- (For Practice this week)

tell
much
keep
give
work
first
try
new
must
start

Word of the week-Ecstatic (adjective)-to be extremely happy about something

Healthy Habits to Help Prevent Sickness

Avoid close contact with people who are sick. When you are sick, keep your distance from others to protect them from getting sick too.

If possible, stay home from work, school, and errands when you are sick. This will help prevent spreading your illness to others.

Cover your mouth and nose with a tissue when coughing or sneezing. It may prevent those around you from getting sick. Flu and other serious respiratory illnesses, like respiratory syncytial virus (RSV), whooping cough, and severe acute respiratory syndrome (SARS), are spread by cough, sneezing, or unclean hands.

Washing your hands often will help protect you from germs. If soap and water are not available, use an alcohol-based hand rub.

Germs are often spread when a person touches something that is contaminated with germs and then touches his or her eyes, nose, or mouth.

Clean and disinfect frequently touched surfaces at home, work or school, especially when someone is ill. Get plenty of sleep, be physically active, manage your stress, drink plenty of fluids, and eat nutritious food.
