

Weissler Weekly

For the week of November 16th, **2020!**

-Announcements

Conferences

We will be having conferences on 12/2 to discuss beginning of the year data. Please look out for a digital sign up sheet going out next week. All conferences will be digital.

Stress in 2nd Grade

Second grade is not the year for a student to be stressed about school. Homework is not intended to take all night and should not be difficult. If any particular assignment or night of homework appears to be too much for your child please email me and do not worry about the work (we can work on it in class the next day).

Report Cards

Report card grades can be found on Skyward as we are all digital with grades. Please let me know if you have any issue accessing the site.

Kindness to Others

As the second semester begins more will be expected of the students in terms of responsibility. It is expected that we make big strides away from egocentrism this year. This is an important year to emphasize other's experiences and feelings. We need to make sure that everyone feels comfortable and welcome in our class. Ask your child what nice things they did for others each day.

Essential Questions

What we are covering this coming week...

Math- Chapter 4

Fluently Add within 100

ELA- Super Storm (Informational)

Main Ideas and Details (RI.2.2) Cause and Effect (RI.2.3) Compound Words (L.2.4d)

5. check
6. finish
7. sharp
8. mother
9. catch
10. chase

Word of the

week-gratitude

(noun)-the quality of being thankful; readiness to show appreciation for and to return kindness.

Healthy Habits to Help Prevent Sickness

Avoid close contact with people who are sick. When you are sick, keep your distance from others to protect them from getting sick too.

If possible, stay home from work, school, and errands when you are sick. This will help prevent spreading your illness to others.

Cover your mouth and nose with a tissue when coughing or sneezing. It may prevent those around you from getting sick. Flu and other serious respiratory illnesses, like respiratory syncytial virus (RSV), whooping cough, and severe acute respiratory syndrome (SARS), are spread by cough, sneezing, or unclean hands.

Washing your hands often will help protect you from germs. If soap and water are not available, use an alcohol-based hand rub.

Germs are often spread when a person touches something that is contaminated with germs and then touches his or her eyes, nose, or mouth.

Clean and disinfect frequently touched surfaces at home, work or school, especially when someone is ill. Get plenty of sleep, be physically active, manage your stress, drink plenty of fluids, and eat nutritious food.
