

# Weissler Weekly

For the week of April 11th, **2021!**

## -Announcements

### Prepare for the day

Please remember to keep sending in those healthy snacks and lunches! Please make sure that your child is getting a good night's sleep. Sleep is often key in determining attitude and effort for the next day.

### Homework Folders

Homework folders need to stay clean and free of clutter. Please make sure you are checking students folders. Daily homework is checked in class and then returned each day, there is no need to keep math or spelling in our folders for the entire week. Only the reading log and stamp sheet will be turned in each week. Currently some students may have their social studies project in their homework folder if they wish to work on it at home.

### End of the third Nine weeks

End of the third Nine weeks is coming up shortly. Please make sure you finish strong by turning in all homework and classwork. Please bring your spelling journals in order for you to get full credit for your completed homework.

### Math Practice/ Sight Words

As we are getting closer to the end of the year we cannot lose focus on the basics. If you have flashcards with basic math facts please have your student practice at home on days with little to no homework. I will be adding a section to our stamp sheets where you can record any amount of time they practice each day.

### Our HLA fundraiser

We are raising funds for new picnic tables! We have already raised enough for 11 new picnic tables. Thank you everyone for your help!

took

books

foot

hoof

cook

nook

hood

wood

stood

shook

Word of the week- strive

(verb)-make great efforts to achieve or obtain something.

## Healthy Habits to Help Prevent Sickness

Avoid close contact with people who are sick. When you are sick, keep your distance from others to protect them from getting sick too.

If possible, stay home from work, school, and errands when you are sick. This will help prevent spreading your illness to others.

Cover your mouth and nose with a tissue when coughing or sneezing. It may prevent those around you from getting sick. Flu and other serious respiratory illnesses, like respiratory syncytial virus (RSV), whooping cough, and severe acute respiratory syndrome (SARS), are spread by cough, sneezing, or unclean hands.

Washing your hands often will help protect you from germs. If soap and water are not available, use an alcohol-based hand rub.

Germs are often spread when a person touches something that is contaminated with germs and then touches his or her eyes, nose, or mouth.

Clean and disinfect frequently touched surfaces at home, work or school, especially when someone is ill. Get plenty of sleep, be physically active, manage your stress, drink plenty of fluids, and eat nutritious food.
